Attention: Ms. Ingrid Ektvedt/

Dear Mesdames:

Re: Electricity Export Permit Application

I write on behalf of Great Bay Energy VI, LLC ("Great Bay") which submitted an application for an electricity export permit using the Board's Online Application System ("OAS") on June 25, 2014. A printed copy of the completed application is enclosed.

Great Bay is incorporated as an LLC in Puerto Rico and its headquarters are located in San Juan, Puerto Rico. It is considered a legal person under American law. The "Province/State" menu dropdown menu in OAS does not list Puerto Rico as an option. As suggested by Board staff, Great Bay completed the application by listing "San Juan & Puerto Rico" in the City box and selecting Florida from the dropdown menu (as the state closest to the physical geographic location of Puerto Rico). The contact information for Great Bay is otherwise complete and accurate.

Please consider this letter an amendment to the application to change the quantity of interruptible energy listed under subsection 5(b) of Section IV of the application to "550,000" MW.h per year. Additionally, please consider this letter an amendment to the application to change the City box to "San Juan" and list "Puerto Rico" under Province/State.

In addition, the Notices of Application submitted through the OAS contained erroneous dates in paragraphs 2 and 4. On the Notices submitted to the Gazette for publication on July 5, 2014, these dates have been corrected and the quantity of interruptible energy contained in the first paragraph of the Notices has been changed from 50,000 MW.h to 550,000 MW.h. The revised Notices are included with this letter.

If you have any questions, don't hesitate to contact me.

Yours truly,

Eric J. Sanchez, CPA

**National Energy Board (the Board or NEB)
Application for a Blanket Electricity Export Permit
Pursuant to s.119.03 of the *National Energy Board Act*
and s.9 of the *National Energy Board Electricity Regulations***

Version Date: September 2012

Application Submission Date: 25/06/2014

SECTION I: DECLARATIONS

The applicant declares the following information to be true:

- ✓ This application is for a blanket electricity export permit which allows the applicant to apply for a permit without having specific export sales arrangements or contracts in place.
- ✓ Neither the applicant, nor any of its affiliates, own, operate or have an interest in electrical facilities including generation, transmission or distribution within Canada.
- ✓ This application is for an electricity export permit that authorizes exports over any of the international power lines in Canada, for which the Board has issued, or will issue, a Certificate of Public Convenience and Necessity, or a Permit.
- ✓ The applicant intends to export electric energy that will be generated by third parties and transmitted using NEB approved transmission lines.
- ✓ The applicant is not aware of any adverse effects that the proposed exports will have on the operation of any power system in the provinces neighbouring the province from which the exports will take place.

SECTION II: EXPORT PERMIT CONDITIONS

The applicant agrees to the following electricity export permit conditions:

The Board's practice is to limit blanket electricity export permits to a ten year term or less. The Board is of the view that, in addition to being consistent with other blanket permit authorizations, the standard ten-year term grants applicants the ability to participate in the evolving electricity markets, while providing the Board the ability to respond sooner to any issues that may emerge in the evolving North American electricity markets.

- ✓ The applicant accepts an electricity export permit with a term of 10 years or less.

SECTION III: INFORMATION NOT REQUIRED

Given that this application is for a blanket electricity export permit by an applicant, where neither the applicant nor its affiliates, own, operate or have an interest in electrical facilities in Canada, and that it declares:

- that it will export over international power lines for which the Board has issued or will issue a certificate or permit; and
- that it has agreed to the conditions identified in Section II of this application form,

additional information related to sections 9 (f), (g), (h), (i), (j), (k), (l), (m), (n), (o), (q) and (r) of the *National Energy Board Electricity Regulations* and Appendix III of the Electricity Memorandum of Guidance is not required at this time. Should the Board require additional information to complete its assessment of the application, it will be requested pursuant to s. 119.05 of the *National Energy Board Act*.

Application Submission Date: 25/06/2014

SECTION IV - APPLICATION INFORMATION

1) Application Date: 06/25/2014

2) Applicant Information:

Legal Status of Applicant

Applicants must be persons. The Interpretation Act, R.S.C. 1985, c. I-21, defines "person" to include a corporation. Partnerships are not expressly included in the definition. Under Canadian law, a partnership is not a legal entity separate from its partners. Accordingly, partnerships established under Canadian legislation cannot hold NEB export or import orders, permits or licences. Rather, a partner(s) or the general partner must apply for and on behalf of the partnership. Where the partnership is established under foreign legislation which does recognize a partnership as a person or a distinct legal entity, however, that partnership can apply for and hold NEB export or import orders, permits or licences.

Check one of the following statements:

The applicant is an individual.

☒ The applicant is a corporation.

The applicant is a partner(s) or the general partner of a limited partnership without the legal capacity of a person.

The applicant is a limited partnership with the legal capacity of a person. If this option is selected, please provide a copy of the provisions of the legislation under which the partnership was formed to demonstrate the partnership's eligibility to hold NEB export or import orders, permits or licences.
