

Application to Participate(A65856)

Filing Date: 2015-02-09

Hearing Information

Project Name: Energy East Project and Asset Transfer

Company: Energy East Pipeline Ltd.

File Number: OF-Fac-Oil-E266-2014-01 02

I am Applying as:

- An Individual
- Authorized Representative on Behalf of an Individual
- A Group

Contact Information:

- If you apply as individual, the contact information is for the Person Applying to Participate.
- If you apply as Authorized Representative, the contact information is for the Individual you are representing.
- If you apply as Group, the contact information is for the Group's main contact.

Salutation: Ms.

Last Name: Dalpe

First Name: Sandra

Title:

Organization:

Telephone: 519-721-3980

Facsimile:

Email Address:

sandra.dalpe@gmail.com

Address:

520 Beaver Creek Crescent
Waterloo, Ontario N2V 2J8
Canada

Authorized Representative(s) Information:

If you do not have an authorized representative this section will be blank.

Method of Participation

I wish to participate as a:

- Commenter
 Intervenor

Interest or Expertise

- I am **directly affected** by the proposed Project
 I have **relevant information or expertise**

Connection to Project Issues

1. The need for the Project
2. The economic feasibility of the Project
4. The appropriateness of the tolling methodology, and the method of toll and tariff regulation, including whether Energy East should be regulated as a Group 1 or Group 2 company
7. The potential environmental and socio-economic effects of the Project, including the environmental effects of accidents or malfunctions that may occur in connection with the project, and any cumulative effects that are likely to result from the Project, as considered under the *Canadian Environmental Assessment Act, 2012*
12. Potential impacts of the Project on directly affected landowners and their land use

- We will all be directly affected by the climate pollution that would be unleashed by Energy East. This is a matter of Canadian public interest, and there is no other federal venue where this impact is being considered.
- Pembina Institute’s preliminary analysis states: filling this 1.1 million barrel per day (bpd) pipeline has the potential to unleash up to 32 million tonnes of climate pollution. This is equivalent to adding 7 million cars on the road.
- According to the Canadian Association of Petroleum Producers, the tar sands industry plans to triple production by 2030. Building new pipelines is necessary to realize these ambitions.
- There is enough pipeline capacity to move existing tar sands production, but further increases will soon exceed capacity. Significant increased capacity to ship crude by rail is a highly unlikely alternative given the limits of this infrastructure, the need of rail capacity for other shipments such as for grain, and the higher costs. Because of these constraints, and the sheer capacity of proposed 1.1 million bpd pipeline, Energy East stands to play a large role in determining how much and how fast the tar sands expand.
- Tar sands production is Canada’s fastest-growing source of greenhouse gas emissions, a leading cause of climate change. This pollution is projected to nearly triple between 2005 and 2020, an increase large enough to cancel out all reductions in greenhouse gas emissions from other parts of Canada.
- How can the NEB propose evaluating whether this new energy infrastructure is in the Canadian public interest without evaluating these very real consequences? This evaluation is tied to the broader pressing need to set ourselves on track towards a more sustainable energy future as we face abundant evidence of a growing climate change crisis.

Access, Notification and Service

517 Tenth Avenue SW
Calgary, Alberta T2R 0A8

517, Dixième Avenue S.-O.
