Connection to Project Issues

4. The potential environmental and socio-economic effects of the Project, including those to be considered under the *Canadian Environmental Assessment Act, 2012*.

I am the instructor for the Sustainable Energy Program at W.C. Miller Collegiate (the Collegiate) in Altona, MB. The Collegiate is roughly 10 km from Enbridge's Gretna station. As the instructor of this provincial education program it is my duty to teach students about the role fossil fuels play in determining the health of our economy and our environment. I regularly take my classes to tour the Enbridge station in Gretna. I can provide the board with expert input regarding high school students' perspectives on pipelines in general and the Enbridge pipeline in particular.

I live in the community of Neubergthal, MB. Neubergthal, a Parks Canada, National Historic Site, is roughly 10 km from Enbridge's Gretna station. I am also a board member of the Neubergthal Heritage Foundation (NHF). The primary purpose of the NHF is to give guidance and direction to maintaining and preserving the historic and heritage aspects of Neubergthal. I can provide the board with input as to how Enbridge developments, such as the lights of the Gretna station which are visible from Neubergthal, may impact the historic and heritage values of this site.
