General Routing Changes Subject to NEB Approval

Keystone has made two applications to the Board, under section 21(1) of the National Energy Board Act, to vary the general route of the Keystone Pipeline that the Board approved in Certificate OC-51, and decisions on these applications are pending.

The first variation application formed part of Keystone's application of November 23, 2007 for the Cushing Expansion, which included, inter alia, a request to vary the approved locations of three pump stations (PS 7 near Monitor, Alberta; PS 8 near Oyen, Alberta; and PS 27 near Haskett, Manitobia). Only PS 7 and PS 8 appear on the plan, profile and book of reference available for public inspection, as described above. The following plan and profile drawings depict both the approved and proposed locations for the two pump stations in Alberta:

- 1779-03-SK-02-116 and
- 1780-03-SK-02-124.

On February 1, 2008, Keystone filed an application to vary the route in the vicinity of crossings of the Red Deer and South Saskatchewan Rivers. The following plan and profile drawings show the approved and proposed pipeline routes:

- 1780-03-SK-02-133;
- · 1780-03-SK-02-133A; and
- 1781-03-SK-03-137.
