

TransCanada Keystone Pipeline GP Ltd. Keystone Pipeline Project

Notice of Proposed Detailed Route Pursuant to Paragraph 34(1)(b) of the National Energy Board Act

IN THE MATTER OF the *National Energy Board Act* and the regulations made thereunder;

IN THE MATTER OF the Certificate of Public Convenience and Necessity OC-51 approving the general route of the Keystone Pipeline Project;

AND IN THE MATTER OF an application by TransCanada Keystone Pipeline GP Ltd. ("Keystone") respecting the determination and approval of the detailed route for the construction of new surface facilities in Saskatchewan and Manitoba, forming part of a crude oil pipeline from Hardisty, Alberta to the international border near Haskett, Manitoba (as shown in Figure "1" to this notice).

If you anticipate that your lands may be adversely affected by the proposed detailed route of the Keystone Pipeline Project, you may oppose the proposed detailed route by filing a written statement of opposition with the Board within thirty (30) days following the publication of this notice. The written statement of opposition must set out the nature of your interest in those lands and the grounds for your opposition to the proposed detailed route.

A copy of any such written statement of opposition must be sent to the following addresses:

National Energy Board
444 – 7th Avenue SW
Calgary, AB T2P 0X8
Attention: Claudine Dutil-Berry, Secretary
Toll Free Fax (877) 288-8803

And to:

TransCanada Keystone Pipeline GP Ltd.
101 – 6th Avenue SW
Calgary, AB T2P 3P4
Attention: John Hunt, Lands Manager – Keystone Pipeline Project
Phone: (403) 920-7383 Fax: (403) 920-2325
Email: john_hunt@transcanada.com

Where a written statement is filed with the Board within the thirty days following the publication of this notice, the Board shall forthwith order, subject to certain exceptions as noted below, that a public hearing be conducted within the area in which the lands to which the statement relates are situated with respect to any grounds of opposition set out in any such statement.

The Board is not required to give any notice, hold any hearing or take any other action with respect to any written statement of opposition filed with the Board and may at any time disregard any such written statement if the person who filed the statement files a notice of withdrawal, or it appears to the Board that the statement is frivolous, vexatious or is not made in good faith.

If the Board determines to hold a public hearing, the Board will fix a suitable time and place of the hearing and publish notice of the hearing in at least one issue of a publication, if any, in general circulation within the area in which the lands proposed to be acquired are situated. The Board will also send such notice to each person who files a written statement of opposition with the Board.

The Board or a person authorized by the Board may make such inspection of the lands proposed to be acquired for or affected by the Keystone Pipeline Project construction as the Board deems necessary.

At the hearing, the Board will permit each person who filed a written statement to make representations and may allow any other interested person to make representations before it as the Board deems proper.

The Board will take into account all written statements and all representations made at the hearing to determine the best possible detailed route of the Keystone Pipeline Project and the most appropriate methods and timing of constructing the Keystone Pipeline Project. The Board may impose in any approval such terms and conditions as it considers proper.

Where the Board has held a hearing in respect of any section or part of the Keystone Pipeline Project and approved or refused to approve the plan, profile and book of reference respecting that section or part, it will forward a copy of its decision and reasons to each person who made representation to the Board at the hearing.

The Board may fix such amount as it deems reasonable in respect of the actual costs reasonably incurred by any person who makes representations to the Board at such a hearing and the amount so fixed will be paid forthwith to the person by Keystone.

A copy of the plan, profile and book of reference for the detailed route is available for inspection by you at the following locations:

Figure 1 Map of the Canadian section of the Keystone Pipeline

Please contact John Hunt, Lands Manager at (403) 920-7383 or the National Energy Board offices at 1-800-899-1265 should you have any questions concerning this Notice, the Plans Profiles and Books of Reference or the detailed route procedures.

As indicated on the map in Figure 1 above, the Canadian section of the Keystone Pipeline consists of three segments:

- 273 km of new pipeline in Alberta and Saskatchewan, commencing at Keystone's inlet terminal near Hardisty, Alberta and terminating near Burstall, Saskatchewan, about 3 km east of the Alberta-Saskatchewan border;
- 864 km of existing gas pipeline between Burstall and Carman, Manitoba that will be converted to oil service (dotted line on the map); and
- 100 km of new pipeline in Manitoba, extending from a point near Carman and ending at the international border near Haskett.

The 864 km of existing gas pipeline between Burstall and Carman currently belongs to one of Keystone's parent companies, TransCanada Pipelines Limited ("TransCanada") and will be transferred to Keystone during 2008. As the segment of pipeline to be converted from gas to oil transmission is pre-existing, the detailed route associated with the conversion is limited to 23 new surface facilities which will be installed along this segment. A new surface facility is any above-ground facility, such as a valve, pump station or launcher-receiver, which is required to change the pipeline segment from gas to oil service and is not located within the footprint of an existing TransCanada above-ground facility.

Definitions for these types of facilities are provided below:

• Valve	A device in the underground pipe to permit or stop the flow of oil, when actuated by an above-ground mechanism.
• Launcher, Launcher Trap	A barrel with a door and hydraulic mechanism for the injection of inspection tools into an operating pipeline.
• Receiver	A barrel with a door and hydraulic mechanism for removing inspection tools from an operating pipeline.
• Pump Station	One or more electrically-driven pumps, together with electrical transformers and controls, used to maintain pressure in the pipeline and thereby keep the oil flowing.

Table 1 below, provides descriptions and locations of the 23 new surface facilities.

Table 1 Descriptions and Locations of New Surface Facilities

General Routing Changes Subject to NEB Approval

Keystone has made two applications to the Board, under section 21(1) of the National Energy Board Act, to vary the general route of the Keystone Pipeline that the Board approved in Certificate OC-51, and decisions on these applications are pending.

The first variation application formed part of Keystone's application of November 23, 2007 for the Cushing Expansion, which included, inter alia, a request to vary the approved locations of three pump stations (PS 7 near Monitor, Alberta; PS 8 near Oyen, Alberta; and PS 27 near Haskett, Manitoba).

On February 1, 2008 Keystone filed an application to vary the route in the vicinity of crossings of the Red Deer and South Saskatchewan Rivers in Alberta.
