

TABLE 1: PID and ANALYTICAL RESULTS FOR STOCKPILE 1 (50 mm crush - Area 1)

SITE	PID	LEPH	HEPH	benzene	toluene	ethylbenzene	meta - & para-Xylene	VPH	Comments
CSR IL STANDARD ⁽¹⁾		2000	5000	0.04	2.5	7	20	200	
SP1-A	289	712	<200	-	-	-	-	-	cell (5 aliquots)
SP1-B	200	904	<200	-	-	-	-	-	cell (5 aliquots)
SP1-C	350	1630	273	-	-	-	-	-	cell (5 aliquots)
SP1-Dup	-	415	<200	-	-	-	-	-	duplicate of SP1-C
SP1-D	320	827	<200	-	-	-	-	-	cell (5 aliquots)
SP1-E	260	1180	<200	-	-	-	-	-	cell (5 aliquots)
SP1-COMP	-	4050	923	-	-	-	-	-	stockpile (250m ³)

Calculated Value Based on BCE Confirmation Testing Guidelines

Stockpile	SP1-C	SP1-D	Mean (X)	SP1-Comp	Calc Value	Standard	Comments
SP-1 (LEPH)	1630	827	1228.5	4050	6872	2000	Calculated value > Standard
SP-1 (HEPH)	273	200	236.5	923	1609.5	5000	Calculated value < Standard

Note: The composite value for LEPH was above the 2000 mg/kg standard. Therefore, all remaining cell samples were analysed. The results for all cell samples were below the applicable standard, therefore, the material was classified as below suspect class (between residential and industrial class)

SP15-COMP	-	792	<200	-	-	-	-	-	stockpile (250m ³)

Calculated Value Based on BCE Confirmation Testing Guidelines

Stockpile	SP15-D	SP15-E	Mean (X)	SP15-Comp	Calc Value	Standard	Comments
SP-15 (LEPH)	2600	982	1791	792	1791	2000	Calculated value < Standard
SP-15 (HEPH)	532	200	366	200	366	5000	Calculated value < Standard

Note: Cell Sample SP15-D was above CSR-IL standards and therefore, this material was removed from the stockpile for reprocessing in the crusher. Since 1 cell sample (SP15-D) was above CSR-IL but calculated value for LEPH was <2000 mg/kg, an additional cell sample was analysed (SP15-A). Since the result for sample SP15-A was below the CSR-IL standard for this cell sample, the stockpile was classified as below suspect class (between residential and industrial class)
