Section 324 Application for Right of Entry ("Application")

Short Legal: 028-994-680 / Tract: PC 7544 ("Lands of the Owner")**

Please find attached an Application pursuant to section 324 of the *Canadian Energy Regulator Act* ("**Act**") requesting an order for Right of Entry for the above-referenced Lands of the Owner necessary for the construction and operation of the Project.

Subsection 55(2) of the *National Energy Board Rules of Practice and Procedure, 1995, SOR/95-208* ("**Rules**"), requires that the Application be served on the Registered Owner and on other persons, insofar as they can be ascertained, interested in the Lands of the Owner (said Registered Owner and other persons hereafter referred to collectively as the "**Owner**") on the same day that the Application is filed with the Canada Energy Regulator ("**Regulator**"). Trans Mountain does not believe that it is reasonably possible or practical to effect same day service and, therefore, seeks relief from this requirement in accordance with the broad discretion conferred upon the Commission of the Regulator ("**Commission**") under section 4 of the Rules. In that regard, under subsection 56(1) of the Rules, the ten (10) day timeline within which the Owner must file any objection to the Application runs from the date that the Application is served. There will, therefore, be no prejudice to the Owner arising from the relief sought. Trans Mountain will attempt to serve the Owner and will file proof of service of the Application as soon as possible after service is effected on the Owner.

In accordance with its records, Trans Mountain understands that communications to the Owner may be directed to the addresses set out in the attached Application.

Trans Mountain wishes to draw the Commission's attention to Exhibit "B" of the Application, which is proof of service ("**Proof of Service**") of the notice served on the Owner pursuant to subsection 324(2) of the Act ("**Notice**"), provided in accordance with subsection 8(8) of the Rules. The Notice is set out in Exhibit "A" of the Application. The original Proof of Service attaches the Notice; however, the attached Notice has been removed from the Proof of Service in the Application in order to reduce the volume of duplicative materials filed with the Regulator. Trans Mountain would be pleased to provide to the Commission Proof of Service attaching the Notice upon request.

Should the Commission require any additional information, please do not hesitate to contact the undersigned.

Trans Mountain Expansion Project ("Project")
OF-Fac-Oil-T260-2013-03 63
Notice of application for right of entry
Short Legal: 028-994-680 / Tract: PC 7544 ("Lands")

As you know, Trans Mountain has been in consultation with you with respect to the portion of the Project route that will cross your Lands.

In particular, Trans Mountain has:

- provided you with an offer to acquire lands for the Project; and
- served you with a notice in relation to the lands proposed to be acquired for the Project pursuant to subsection 322(1) of the *Canadian Energy Regulator Act* ("**CER Act**").

It is Trans Mountain's preference to complete a negotiated agreement for the land rights necessary to construct, operate and maintain the Project. However, through its engagement program, Trans Mountain understands that you have not accepted the current offer of compensation.

To ensure that Trans Mountain has access to land for construction and meets its customer commitments, it is necessary for Trans Mountain to initiate the right of entry process by serving you with a Notice of Application for immediate right of entry ("**Notice**") pursuant to subsection 324(2) of the CER Act. Please find the Notice attached to this letter as Attachment B.

The Commission of the Canada Energy Regulator ("**Commission**") may, if you and Trans Mountain do not come to an agreement, on application, determine compensation associated with the rights acquired through right of entry, if granted, in accordance with the limited factors prescribed by the CER Act.

If this matter proceeds to right of entry, the determination of compensation payable will be based on the right to use any areas required. The bonus payment currently offered would not be part of Trans Mountain's compensation position before the Commission and any damages caused by construction activities will be compensated separately.

Trans Mountain intends to file the right of entry application and access the Lands for Project construction in accordance with the timelines set out in the enclosed Notice.

Attached hereto as Attachment A to this letter is the Canada Energy Regulator Information Letter dated December 16, 2020 regarding the right of entry application process ("**Information Letter**").

In the meantime, should you have any further questions, please do not hesitate to contact the undersigned at TMEP_Land@transmountain.com or your designated Project Land Representative.

Yours truly,

Notice of Trans Mountain's Application pursuant to
Section 324 of the Canadian Energy Regulator Act (CER Act)
Right of Entry**

Canada Energy Regulator Information Letter

Purpose

You are receiving this letter from the Canada Energy Regulator because Trans Mountain has served you with a **notice** of Trans Mountain's intention to file an application for a right of entry order in the future. This notice includes information from Trans Mountain regarding the date on which the company intends to make its *application* for right of entry. If and when Trans Mountain files a right of entry application, you will be served with the application and you will have certain rights to participate in the application process.

The Canada Energy Regulator is providing you this letter in order to provide you information to familiarize yourself with the right of entry process.

Background Materials

On 19 May 2016, the National Energy Board (NEB or Board) issued its OH-001-2014 Report recommending that the Governor in Council (GIC) approve the TMEP, subject to 157 conditions ([A77045](#)).

On 29 November 2016, the GIC directed the Board to issue Certificate of Public Convenience and Necessity OC-064 ([A80871](#)), the effect of which was to approve the TMEP, including the 150 metre wide corridor.

On 18 June 2019 the GIC issued the Order in Council approving the Board's MH-052-2018 Reconsideration Report ([A98021](#)).

On 28 August 2019, pursuant to the Canadian Energy Regulator Act, the National Energy Board (NEB) was replaced with the Canada Energy Regulator (CER). The NEB's adjudicative work has been transferred to the Commission of the Canada Energy Regulator.

The CER has directed Trans Mountain to provide this information letter with all notices of application for right of entry.

For any questions, please contact a CER Process Advisor by phone at 1-800-899-1265 (toll-free), or by email at TMX.ProcessHelp@cer-rec.gc.ca.

Right of Entry

If a company requires the use of private lands for its CER-regulated project, it must first acquire the necessary land rights through a land acquisition agreement. If the company and a landowner are unable to finalize a land acquisition agreement, the company can file with the CER a right of entry application for an order to enable the company to enter the lands. The Commission expects that the company and the landowner have made every reasonable attempt to finalize a land acquisition agreement.

The process to be followed for right of entry applications is summarized in the diagram attached to this letter.

Objection to an Application for Right of Entry

If you are served with an application for a right of entry order *after you receive this notice*, you have a right to file a written objection to the application. Objections must be filed with the CER and served on Trans Mountain, within **10 calendar days of the landowner's receipt of the application**.

The CER has created a template for landowners to complete in the event that they wish to file an objection to a right of entry application. The written objection template can be found on the CER's website at: <https://www.cer-rec.gc.ca/en/consultation-engagement/form/objection-right-entry-covid.pdf>

Further information regarding an objection to a right of entry application:

Timing

Section 56 of the *National Energy Board Rules of Practice and Procedure, 1995*, governs the process for objections and replies to objections. Please note the objection period begins after an *application* is filed; no filings are required where Trans Mountain has provided *notice* of a future application. See the Additional Resources at the end of this letter for more information.

After the application is filed, a landowner may file an objection, and the company may file a reply. Steps 3 and 4 of the attached diagram outline the objection and reply process.

Additional objection or reply submissions filed by either party after this process shall be disregarded and will not form part of the record, unless prior leave was granted by the Commission. Requests for leave to file additional materials may be made in writing to the Commission, copying Trans Mountain. The request must include an explanation or reasons justifying the requested relief. Such relief will only be granted in exceptional circumstances.

Content

The Commission reminds landowners that the right of entry process is not intended to consider impacts of the TMEP that have been, or could have been, reviewed in previous regulatory processes (see Background Materials above).

The Commission encourages landowners to provide comments regarding whether the right of entry application is appropriate as applied for, and comments regarding the particular terms and conditions of the right of entry.

The Commission reminds landowners that certain information may be privileged and confidential, such as the content and form of settlement negotiations between you and Trans Mountain. This information should not be included in the objection, unless both parties agree to waive any privilege.

Finally, the Commission advises landowners that landowners are entitled to compensation for the acquisition of lands, however, **disputes regarding compensation are not considered in the Commission's assessment of a right of entry application.** Further information regarding compensation disputes is provided below.

Compensation Related Matters

Under Part 6 of the CER Act, parties may apply to the Commission to determine compensation disputes in relation to land matters. The CER's [*Guidance on Land Related Compensation Disputes*](#), provides further information about when compensation may be available.

If parties are unable to resolve a compensation dispute through their own negotiation efforts, the CER can support the resolution of the dispute in two ways: ADR or adjudication (hearing and decision). Interested parties may submit a complaint or application to the CER to commence either or both of these compensation dispute proceedings.

In line with the principles of natural justice, compensation dispute proceedings will be dealt with independently from the right of entry process. Right of entry processes will proceed along their normal course regardless of whether parties are also participating in a compensation dispute proceeding.

Process Advisors and Alternative Dispute Resolution Services

The CER has Process Advisors in place to respond to your questions about the right of entry process. You can reach them by email at TMX.ProcessHelp@cer-rec.gc.ca or you can call 1-800-899-1265 (toll free).

The Commission's alternative dispute resolution (ADR) services are available to assist parties to reach resolution of outstanding issues outside of the regulatory process. ADR processes are uniquely tailored to individual needs and could take the form, for example, of a meeting between landowners and Trans Mountain. To take advantage of ADR, both the landowner and Trans Mountain must agree to take part. This process is voluntary and facilitated by trained Board staff, or by another neutral third party. If interested in using the Commission's ADR services or learning more information about ADR options, please email ADR-MRD@cer-rec.gc.ca or call 1-800-899-1265 (toll free).
